- g. To encourage infill development of areas or site characterized by special features of geography, topography, size, shape, or historical legal nonconformity;
- h. To permit flexibility of design that will create desirable public and private open space, to vary the type, design and layout of buildings, and to utilize the potentials of individual sites and alternative energy services to the extent possible;

1. Kittitas County has a wide range of natural features, including climate, vegetation, water, resources, scenic qualities, cultural, and geological features, which are desirable for a wide range of recreational users to enjoy. The purpose of this chapter is to establish a master planned resort zoning district to be applied to those properties the board of county commissioners determines are appropriate for development as a master planned resort consistent with county comprehensive plan policies and RCW 36.70A.360.
2. It is the county's intent that a master planned resort be located only on a site of at least 320 contiguous acres. (Ord. 2000-13, 2000).

17.37.020 Definitions.

The following definitions shall be used in conjunction with the administration of this chapter:

1. "Master planned resort," consistent with RCW 36.70A.360, means a self-contained and fully integrated planned unit development, located in a setting of significant natural amenities, with a primary focus on destination resort facilities consisting of short-term visitor accommodations associated with a range of developed on-site indoor or outdoor recreational facilities. A master planned resort may include other residential uses within its boundaries, but only if the residential uses are integrated into and support the on-site recreational nature of the resort.
2. "Short-term visitor accommodations" means the following master planned resort accommodation units: (1) hotel or motel units; (2) time-share and fractionally owned units; (3) recreational vehicle sites with power and water; and (4) vacation and second homes as described below.

A master planned resort accommodation unit is a vacation or second home for purposes of this section unless its occupant(s) is either (1) registered to vote at such unit's resort address or (2) receive its/their Kittitas County annual property tax assessment for such unit at such unit's address, in which case such unit shall be considered a permanent residence for all purposes under this section. (Ord. 2000-13, 2000).

17.37.030 Uses permitted.

The following uses may be permitted within a master planned resort classification:

1. All residential uses including single-family and multifamily structures, condominiums, time-share and fractionally owned accommodations of all kinds, provided such uses are integrated into and support the on-site recreational nature of the master planned resort.
2. Short-term visitor accommodations, including, but not limited to, hotels, motels, lodges, and any residential use permitted under subsection A of this section that is made available for short-term rental; provided, however, short-term visitor

- accommodation units shall constitute greater than 50 percent of the total resort accommodation units.
3. Indoor and outdoor recreational facilities and uses, including, but not limited to, golf courses (including accessory structures and facilities, such as clubhouses, practice facilities, and maintenance facilities), tennis courts, swimming pools, marinas, alpine and/or cross country skiing, hiking and nature trails, bicycle paths, equestrian facilities, skating arenas, sports complexes, bowling alleys, and other recreational uses deemed to be consistent with the on-site recreational nature of the master planned resort.
 4. Campgrounds and recreational vehicle ("RV") sites with power and water; provided, however, campgrounds and recreational vehicle sites without power and water are conditional uses.
 5. Visitor-oriented amenities, including, but not limited to (1) restaurants, cafes, delicatessens, pubs, taverns and cocktail bars and entertainment associated with such uses; (2) meeting facilities; (3) on-site retail businesses and services limited to those typically found on other destination resort properties and which are designed to serve the convenience needs of the users and employees of the master planned resort; and (4) recreation businesses and facilities. Retail and commercial services offered on the resort shall be designed to discourage use from non-resort users by locating such services well within the site rather than on its perimeter.
 6. Cultural and educational facilities of all kinds, including, but not limited to, interpretative centers and exhibits, and indoor and outdoor theaters.
 7. Roadways and bridges, which, subject to any development agreement executed with the county pursuant to Chapter 15A.11 KCC, Development Agreements, and RCW 36.70B.170 through 36.70B.210, may include roadways and bridges that are privately owned and maintained.
 8. Industrial uses and capital facilities, utilities and services to the extent necessary to maintain and operate the master planned resort.
 9. Temporary and/or permanent structures to serve as sales offices.
 10. Any other similar uses deemed by the Community Development Services director to be consistent with the purpose and intent of this chapter, the county comprehensive plan policies regarding master planned resorts, and RCW 36.70A.360. (Ord. 2000-13, 2000).

17.37.040 Applications/approvals required for master planned resorts.

1. A master planned resort may be authorized by the county only through approval of a master planned resort development permit in conjunction with approval by the board of county commissioners of a development agreement as authorized by Chapter 15A.11 KCC, Development Agreements, and RCW 36.70B.170 through 36.70B.210. Consistent with KCC 15A.11.020(B) and RCW 36.70B.170, the development agreement approved by the board of county commissioners must set forth the development standards applicable to the development of a specific master planned resort, which may include, but are not limited to: (1) permitted uses, densities and intensities of uses, and building sizes; (2) phasing of development, if requested by the applicant; (3) procedures for review of site-

- specific development plans; (4) provisions for required open space, visitor-oriented accommodations, short-term visitor accommodations, on-site recreational facilities, and on-site retail/commercial services; (5) mitigation measures imposed pursuant to the State Environmental Policy Act, Chapter 43.21C RCW, and other development conditions; and (6) other development standards including those identified in KCC 15A.11.020(E) and RCW 36.70B.170(3).
2. Required Applications/Approvals. In addition to approval of a MPR development permit and a development agreement as set forth in subsection A of this section, a master planned resort shall require the following approvals from the county: (1) a site-specific amendment of the comprehensive plan land use designation map to master planned resort; provided, that the sub-area planning process described in Chapter 1 of the county comprehensive plan and Chapter 15B.03 KCC, Amendments to Comprehensive Plan, may be used if deemed appropriate by the applicant and county; and (2) a site-specific rezone of the county zoning map to master planned resort zoning district pursuant to Chapter 17.98 KCC, Amendments. The comprehensive plan amendment or subarea plan and rezone may be processed by the county concurrent with the master planned resort development permit and development agreement required for approval of a master planned resort.
 3. Planned Actions Authorized. If deemed appropriate by the applicant and the county, a master planned resort project may be designated by the county as a planned action pursuant to the provisions of Chapter 15A.09 KCC, Planned Actions. (Ord. 2000-13, 2000).

17.58.040A Airport overlay zoning district: Kittitas County Airport (Bowers Field)

In order to carry out the provisions of this chapter, there is hereby created an airport overlay zoning district that is composed of the following surface and safety zones for Kittitas County Airport (Bowers Field). The zones cover a geographic area that is affected by airport activities and are defined on the basis of factors including, but not limited to, aircraft noise, aircraft flight patterns, airport safety zones, local circulation patterns and area development patterns. The boundaries of the airport surface and safety zones are shown on airport overlay zoning district Map "A" - "Part 77" and Map "B" - "Airport Safety Zones", which are attached hereto and incorporated by reference, and which shall also be on file and open for inspection in the Kittitas County Community Development Services, Kittitas County Public Works department, and the city of Ellensburg community development department. The surface and safety zones are overlaid on top of the existing underlying zoning, which remains in full force and effect. Where the requirements imposed by the surface and safety zones conflict with the requirements of the underlying zoning, the more restrictive requirement shall be enforced.

1. Surface Zones. In order to carry out the provisions of this chapter, there are created and established certain surface zones which include all of the land lying beneath the approach surfaces, transitional surfaces, horizontal surfaces, and conical surfaces as they apply to Kittitas County Airport (Bowers Field). Such zones are shown on Kittitas County Airport (Bowers Field) overlay zoning map "A", as amended. Within each of the surface zones there are hereby established certain height restrictions for structures and trees. The surface zones are established and defined as follow:
 - a. Runways 07, 25, and 11, Larger than Utility with a Visibility Minimum Greater than Three-Fourth Mile Nonprecision Instrument Approach Zone. The 500-foot inner edge coincides with the width of the primary surface and slopes 34 feet outward for each one foot upward beginning at the end of and at the same elevation as the primary surface and expands to a horizontal distance of 3,500 feet at a horizontal distance of 10,000 feet along the extended runway centerline. Its centerline is the continuation of the runway centerline as depicted on map "A".

Height Restrictions: No object shall penetrate the imaginary line created by a slope 34 feet outward for each one foot upward beginning at the end of and at the same elevation as the primary surface and extending to a horizontal distance of 10,000 feet along the extended runway centerline.

- b. Runway 29, Larger than Utility with a Visibility Minimum Lower than Three-Fourth Mile Precision Instrument Approach Zone. The 1,000-foot inner edge of this approach zone coincides with the width of the primary surface. The approach zone expands uniformly to a width of 16,000 feet at a horizontal distance of 50,000 feet from the primary surface. Its centerline is the continuation of the centerline of the runway as depicted on map "A".

Height Restrictions: No object shall penetrate the imaginary line created by a slope 50 feet outward for each one foot upward for the first 10,000 feet of this zone and 40 feet outward for each one foot upward for the remaining 40,000 feet of this zone.

- c. Transitional Zones. This zone is defined by a slope seven feet outward for each one foot upward beginning at the sides of and at the same elevation as the primary surface and the approach surface, and extending to a height of 150 feet above the airport elevation which is 139 feet above mean sea level.

Height Restrictions: No object shall penetrate the imaginary line created by a slope seven feet outward for each one foot upward beginning at the sides of and the same elevation as the approach surface, and extending to where they intersect the conical surface. Further, where the precision instrument runway approach zone projects beyond the conical zone, no object shall penetrate the imaginary line created by a slope seven feet outward for each one foot upward beginning at the sides of and the same elevation as the approach surface, and extending a horizontal distance of 5,000 feet measured at 90degree angles to the extended runway centerline.

- d. Horizontal Zone. The zone is established at 150 feet above the airport elevation or at a height of 1,916 feet above mean sea level by swinging arcs of 5,000 feet radial for all runways designated utility or visual and 10,000 feet for all other runways from the centers of the primary surface of each runway and connecting adjacent arcs by drawing lines tangent to those arcs. The horizontal zone does not include the approach and transitional zones.

Height Restrictions: No object shall penetrate the imaginary horizontal line created at 150 feet above the airport elevation or at a height above the airport of 1,916 feet above mean sea level.

- e. Conical Zone. The conical zone is established as the area that commences at the periphery of the horizontal zone and extends outward there from for a horizontal distance of 4,000 feet as depicted in map "A".

Height Restrictions: No objects shall penetrate the imaginary line created by a slope 20 feet outward for each one foot upward beginning at

the periphery of the horizontal zone and at 150 feet above the airport elevation and extending to a height up to 3,500 feet above the surface of the land.

2. Safety Zones. In order to carry out the provisions of this chapter and to promote land use compatibility on lands within and adjacent to and in the vicinity of the Kittitas County Airport (Bowers Field), there are created and established certain safety zones. Such safety zones are shown on Kittitas County Airport (Bowers Field) overlay zoning district map "B", as amended. Within each of the safety zones, certain land use limitations are established and certain development standards are imposed in addition to the land uses and development standards of the underlying zoning. Where the requirements imposed by these safety zones conflict with the requirements of the underlying zoning, the more restrictive requirement shall be enforced. The safety zones are established and defined as follows:
 - a. Runway Protection Zone 1. An area extending beyond the centerlines of runways 11, 29, 07, and 25 as depicted on map "B" (shaded area #1). This zone begins from the outer boundaries of the primary surface, 200 feet from the ends of the runways and extends out 1,700 feet to its widest point, which measures 1,010 feet across, 505 feet on either side of the runway centerline.
 - b. Inner Safety Zone 2. An area extending beyond the centerlines of runways 11, 29, 07, and 25 as depicted in map "B" (shaded area #2). This zone begins at the end of the runway protection zone 1 and extends out 2,800 feet, The zone measures 1,010 feet across, 505 feet on either side of the runway centerline.

17.58.040B Airport overlay zoning district: Easton State, Cle Elum Municipal, and DeVere Field.

In order to carry out the provisions of this chapter, there is hereby created an airport overlay zoning district that is composed of the following surface and safety zones for the Easton State, Cle Elum Municipal and DeVere Field. The zones cover a geographic area that is affected by airport activities and are defined on the basis of factors including, but not limited to, aircraft noise, aircraft flight patterns, airport safety zones, local circulation patterns and area development patterns. The surface and safety zones are overlaid on top of the existing underlying zoning, which remains in full force and effect. Where the requirements imposed by the surface and safety zones conflict with the requirements of the underlying zoning, the more restrictive requirement shall be enforced. With the exception of those necessary and incidental to airport operations, no uses shall be permitted that allow buildings, structures, vegetation or other development that penetrates the imaginary air surfaces described below. As part of this section, Kittitas County recognizes the current planning effort being undertaken by the City of Cle Elum for the Cle Elum Municipal Airport, and anticipates that at the time of completion of such efforts such plans shall be incorporated and identified in this code.

1. Surface Zones. In order to carry out the provisions of this chapter, there are created and established certain surface zones which include all of the land lying beneath the approach surfaces, transitional surfaces, horizontal surfaces, and conical surfaces as they apply to Kittitas County Airport (Bowers Field). Such zones are shown on Kittitas County Airport (Bowers Field) overlay zoning map "A", as amended. Within each of the surface zones there are hereby established certain height restrictions for structures and trees. The surface zones are established and defined as follow:

Approach Zone. A surface longitudinally centered on the extended runway centerline.

Visual Runways. The 500-foot inner edge coincides with the width of the primary surface and slopes 20 feet outward for each one foot upward beginning at the end of and at the same elevation as the primary surface and expands to a width of 1,250 feet at a horizontal distance of 5,000 feet along the extended runway centerline.

Nonprecision Instrument Approach Zone. The 500-foot inner edge coincides with the width of the primary surface and slopes 34 feet outward for each one foot upward beginning at the end of and at the same elevation as the primary surface and expands to a width of 3,500 feet at a horizontal distance of 10,000 feet along the extended runway centerline. Its centerline is the continuation of the runway centerline as depicted on map "A".

Precision Instrument Approach Zone. The 1,000-foot inner edge of this approach zone coincides with the width of the primary surface and slopes 50 feet outward for each one foot upward for the first 10,000 feet of this zone and 40 feet outward for each one foot upward for the remaining 40,000 feet of this

zone. The zone begins at the end of and at the same elevation as the primary surface. The approach zone expands uniformly to a width of 16,000 feet at a horizontal distance of 50,000 feet from the primary surface. Its centerline is the continuation of the centerline of the runway as depicted on map "A".

Transitional Zones. This zone is defined by a slope seven feet outward for each one foot upward beginning at the sides of and at the same elevation as the primary surface and the approach surface, and extending to a height of 150 feet above the airport elevation which is 139 feet above mean sea level.

Where the precision instrument runway approach zone projects beyond the conical zone, no object shall penetrate the imaginary line created by a slope seven feet outward for each one foot upward beginning at the sides of and the same elevation as the approach surface, and extending a horizontal distance of 5,000 feet measured at 90degree angles to the extended runway centerline.

Horizontal Zone. The zone is established at 150 feet above the airport elevation by swinging arcs of 5,000 feet radial for all runways designated utility or visual and 10,000 feet for all other runways from the centers of the primary surface of each runway and connecting adjacent arcs by drawing lines tangent to those arcs. The horizontal zone does not include the approach and transitional zones.

The established airport elevations for airports in Kittitas County are as follows:

- Kittitas County Airport (Bowers Field) – 1,916 feet above mean sea level
- Easton State Airport – 2221 feet above mean sea level
- De Vere Field – 1838 feet above mean sea level
- Cle Elum Municipal – 1945 feet above mean sea level

Conical Zone. The conical zone is established as the area that commences at the periphery of the horizontal zone and extends outward there from for a horizontal distance of 4,000 feet as depicted in map "A".

Height Restrictions: No objects shall penetrate the imaginary line created by a slope 20 feet outward for each one foot upward beginning at the periphery of the horizontal zone and at 150 feet above the airport elevation and extending to a height up to 3,500 feet above the surface of the land.

2. Safety Zones. In order to carry out the provisions of this chapter and to promote land use compatibility on lands within and adjacent to and in the vicinity of the Kittitas County Airport (Bowers Field), there are created and established certain safety zones. Such safety zones are shown on Kittitas County Airport (Bowers Field) overlay zoning district map "B", as amended. Within each of the safety zones, certain land use limitations are established and certain development standards are imposed in addition to the land uses and development standards of the underlying zoning. Where the requirements imposed by these safety zones conflict with the requirements of the

underlying zoning, the more restrictive requirement shall be enforced. The safety zones are established and defined as follows:

- a. Runway Protection Zone 1. An area extending beyond the centerlines of runways 11, 29, 07, and 25 as depicted on map "B" (shaded area #1). This zone begins from the outer boundaries of the primary surface, 200 feet from the ends of the runways and extends out 1,700 feet to its widest point, which measures 1,010 feet across, 505 feet on either side of the runway centerline.
- b. Inner Safety Zone 2. An area extending beyond the centerlines of runways 11, 29, 07, and 25 as depicted in map "B" (shaded area #2). This zone begins at the end of the runway protection zone 1 and extends out 2,800 feet, The zone measures 1,010 feet across, 505 feet on either side of the runway centerline.
- c. Inner Turning Zone 3. A fan shaped area extending beyond the center lines of runways 11, 29, 07, and 25 as depicted on map "B" (shaded area #3). This zone begins at the primary surface, 200 feet from the end of the runway centerline and extends out with a 60-foot radius arc on either side of the runway centerline to 4,500 feet and connects to the centerline of the inner safety zone with sweeping arcs.
- d. Outer Safety Zone 4. Area extending beyond the centerlines of runways 11, 29, 07, and 25 as depicted on map "B" (shaded area #4). This zone begins at the end of the inner safety zone and extends out 3,000 feet. The zone measures 1,000 feet across, 500 feet on either side of the runway centerline.
- e. Sideline Zone 5. An area adjacent to runways 11, 29, 07, and 25 as depicted on map "B" (shaded area #5). This zone begins from the outer boundaries of the primary surface, and extends out 1,000 feet perpendicular to the primary surface and connects to the 60-degree sector of the inner turning zone.
- f. Airport Operations Zone 6. This zone is depicted on map "B" (shaded area #6) and begins from the outer boundaries of the sideline zone and extends out 5,000 feet perpendicular to the primary surface and connects to the 60degree sector of the inner turning zone. (Ord. 2001-10 (part), 2001).

17.58.050 Uses, development requirements and restrictions.

1. General Development Requirements and Restrictions Applicable to All Zones.
 - a. Underlying Zoning Requirements. In addition to the airport overlay zoning district development requirements and restrictions set forth in subsections (A)(2) through (9) of this section and in the table in subsection B of this section, all uses and activities are at all times subject to the requirements of the underlying zoning district. Where the requirements and restrictions imposed by the airport overlay zoning district surface and safety zones conflict with the requirements of the underlying zoning district, the more restrictive requirement shall be applied.

17.58.060 Permits.

1. Future Uses. Except as specifically provided in subsections (A)(1), (2), and (3) of this section, no material change shall be made in the use of land, no structure shall be erected or otherwise established, and no tree shall be planted in any zone created unless a permit therefore has been applied for and granted. Each application for a permit shall indicate the purpose for which the permit is desired, with sufficient particularity to permit it to be determined whether the resulting use, structure, or tree is consistent with the provisions of this chapter. No permit for a use inconsistent with the provisions of this chapter shall be granted unless a variance has been approved in accordance with subsection D of this section.
 - a. In the area lying within the limits of the horizontal zone and conical zone, no permit shall be required for any tree or structure less than 75 feet of vertical height above the ground except when, because of terrain, land contour, or topographic features, such tree or structure would extend above the height limits prescribed for such zones.
 - b. In areas lying within the limits of the approach zones but at a horizontal distance of not less than 4,200 feet from each end of the runway, no permit shall be required for any tree or structure less than 75 feet of vertical height above the ground, except when such tree or structure would extend above the height limit prescribed for such approach zones.

- c. In the areas lying within the limits of the transition zones beyond the perimeter of the horizontal zone, no permit shall be required for any tree or structure less than 75 feet of vertical height above the ground, except when such tree or structure, because of terrain, land contour, or topographic features, would extend above the height limit prescribed for such transition zones.
 - d. As a condition for approval of new development within the approach surfaces or safety zones a notice shall be recorded with the county auditor prior to final approval of new subdivisions, short subdivisions, building permits, conditional use permits, special use permit or other similar permits, unless said notice is already recorded on the property. Said notice shall state: “This property is located adjacent to an airport and routinely subject to overflight activity by aircraft using the airport; residents and tenants may experience inconvenience, annoyance, or discomfort from noise, smell or other effects of aviation activities.”
 2. Existing Uses. No permit shall be granted that would allow the establishment or creation of an obstruction or permit a nonconforming use, structure, or tree to become a greater hazard to air navigation, than it was on the effective date of the ordinance codified in this chapter or any amendments thereto or than it is when the application for a permit is made.
 3. Nonconforming Uses Abandoned or Destroyed. Whenever the airport manager, or his or her designee, determines that a nonconforming or structure has been abandoned or more than eighty percent torn down, physically deteriorated, or decayed, no permit shall be granted that would allow such structure to exceed the applicable height limit or otherwise deviate from the zoning regulations.
 4. Variances. Any person desiring to erect or increase the height of any structure, or permit the growth of any tree, or use property, not in accordance with the regulations prescribed in this chapter, may apply to the board of adjustment for a variance from such regulations. The application for variance shall be accomplished by a determination from the Federal Aviation Administration as to the effect of the proposal on the operation of air navigation facilities and the safe, efficient use of navigable airspace. Such variances shall be allowed where it is duly found that a literal application or enforcement of the regulations will result in unnecessary hardship and relief granted, will not be contrary to the public interest, will not create a hazard to air navigation, will do substantial justice, and will be in accordance with the spirit of this chapter. A copy of the variance application shall be forwarded to the Kittitas County airport manager by the Kittitas County Community Development Services department consistent with the notification procedures under KCC Title 15A.
 5. Obstruction Marking and Lighting. Any permit or variance granted may, if such action is deemed advisable to effectuate the purpose of this chapter, be so conditioned as to require the owner of the structure or tree in question to install, operate, and maintain, at the owner's expense, such markings and lights as may be necessary. (Ord. 2001-10 (part), 2001).
 6. Nothing in this chapter shall diminish the responsibility of project proponents to submit a Notice of Construction or Alteration to the Federal Aviation

Administration if required in accordance with Federal Aviation Regulations Part 77, “Objects Affecting Navigable Airspace”.

17.58.070 Nonconforming use - Regulations not retroactive.

The regulations prescribed in this chapter shall not be construed to require the removal, lowering, or other change or alteration of any structure or tree not conforming to the regulations at the effective date of the ordinance codified in this chapter, nor shall such be construed to require any change in the construction or alteration of any structure or tree which was begun prior to the effective date of the ordinance codified in this chapter, and which is diligently being prosecuted. (Ord. 2001-10 (part), 2001).

17.58.080 Violations and enforcement.

It shall be the duty of the code enforcement official of the Kittitas County building department to administer and enforce the regulations prescribed in this chapter. (Ord. 2001-10 (part), 2001).

17.58.090 Appeals.

Any person aggrieved, by any order, requirement, decision or determination made by an administrative official in the processing of any application made under this chapter or in the actual decision made as required by this chapter may appeal to the board of adjustment as provided in RCW 14.12.190. (Ord. 2001-10 (part), 2001).

17.58.100 Judicial review.

Any person aggrieved, or any taxpayer affected, by any decision of the board of adjustment, may appeal to the circuit court as provided in Section III of Chapter 12 of the Public Laws of the State. (Ord. 2001-10 (part), 2001).

17.58.110 Conflicting regulations.

Where there exists a conflict between any of the regulations or limitations prescribed in this chapter and any other regulations applicable to the same area, whether the conflict be with respect to the height of structures or trees, and the use of land, or any other matter, the more stringent limitation or requirement shall govern and prevail. (Ord. 2001-10 (part), 2001).

- 17.60B.110 Appeal of Administrator’s Decision.

17.60B.010 Applicability.

The provisions of this chapter shall apply to all uses listed as an administrative use in the applicable zoning district. Administrative uses are those uses subject to standards that are applicable for all permits and those that require the exercise of limited discretion about non-technical issues and about which there may be limited public interest. The proposed development may or may not be subject to SEPA review.

17.60B.020 Purpose.

The purpose of this chapter is to establish criteria and procedures for uses, which due to their unique qualities may require additional regulations or other special degrees of control. The administrative use process, which includes public notice and comment, is required to ensure that the activity, if established, will be in full compliance with the applicable regulations and that such uses are compatible with the comprehensive plan, adjacent uses, planned uses and the character of the vicinity.

17.60B.030 Administrative Authority.

The director of Community Development Services is authorized to approve, approve with the conditions stated in this chapter and additional conditions deemed necessary to satisfy the purposes of this chapter and the criteria found in Section 17.60B.050 an administrative use permit. Any additional requirements obtained from other sections of the Kittitas County Code above those specified in this title, or modification of the proposal to comply with specified requirements or local conditions is also authorized. At the discretion of the administrator or by request of interested parties, the request for an administrative use permit can be heard by the Board of Adjustment.

The Board of Adjustment may deny an application for an administrative use permit if the use fails to comply with specific standards set forth in this title and if any of the required findings in Section 17.60B.050 are not supported by evidence in the administrative record.

17.60B.040 Fees.

The fees for such application shall be consistent with the most updated fee schedule as established annually by the board of county commissioners under separate action. Fees shall be payable to the Kittitas County Treasurer and shall not be refundable in any case.

17.60B.050 Administrative Review.

The development standards of this title shall be used by the applicant in preparing the administrative use permit application, and by the administrator in determining the

acceptability of permitting a use in a certain location. The applicant has the burden of proving that the proposed use meets criteria set forth below in this section. An administrative use permit may be approved only if all of the following findings can be made regarding the proposal and are supported by the record:

- (1) That the granting of the proposed administrative use permit approval will not:
 - (A) Be detrimental to the public health, safety, and general welfare;
 - (B) Adversely affect the established character of the surrounding vicinity and planned uses; nor
 - (C) Be injurious to the uses, property, or improvements adjacent to, and in the vicinity of, the site upon which the proposed use is to be located.
- (2) That the granting of the proposed administrative use permit is consistent and compatible with the intent of goals, objectives and policies of the comprehensive plan, and any implementing regulation.
- (3) That all conditions necessary to mitigate the impacts of the proposed use are conditions that are measurable and can be monitored and enforced.
- (4) That the applicant has addressed all requirements for a specific use.

17.60B.060 Administrative Action.

A decision by the administrator shall include the following:

- (1) A statement of the applicable criteria and standards in the development codes and other applicable law.
- (2) A statement of the findings of the review authority, stating the applicant's compliance or noncompliance with each applicable criterion, and assurance of compliance with applicable standards.
- (3) The decision to approve or deny the application; if approved any decision must state all conditions of approval.
- (4) A statement that the decision is final unless appealed as provided in the respective governing regulation within fourteen calendar days after the date the notice of decision is mailed. The appeal closing date shall be listed. The statement shall describe how a party may appeal the decision, including applicable fees and the elements of a notice of appeal.
- (5) A statement that the complete case file is available for inspection and the name and telephone number of the department's representative to contact to arrange inspection.

17.60B.070 Permit Processing and Notice.

Administrative use permits shall be processed in accordance with the provisions contained in this chapter and the provisions of Title 15A, Project Permit Application Process of the Kittitas County Code.

17.60B.080 Effect.

In any case where an administrative use permit is granted under the terms of this title, no building or other permit shall be issued until the end of the appeal period allowed in Title 15A, Project Permit Application Process of the Kittitas County Code. An appeal of the decision shall automatically stay the issuance of building or other permits until such appeal has been completed.

17.60B.090 Transfer of Ownership.

The granting of an administrative use permit and the conditions set forth run with the land; compliance with the conditions of the administrative use permit is the responsibility of the current owner of the property, the applicant and successors.

17.60B.100 Expiration.

An administrative use permit shall become void three years after approval or such other time period as established by the administrator if no substantial construction or satisfying the conditions of approval has taken place.

17.60B.110 Appeal of Administrator's Decision.

Action by the Administrator is final unless an appeal in writing is filed with the Board of Adjustment, together with the applicable fee, within the time allowed per Title 15A, Project Permit Application Process of the Kittitas County Code. The request shall conform to the requirements of Section 15A.07, Project Permit Application Process of the Kittitas County Code.

17.61.030 Review criteria - Special utilities and associated facilities.

1. The board of adjustment shall determine that adequate measures have been undertaken by the proponent of the special utility and/or associated facility to reduce the risk of accidents caused by hazardous materials.
2. The board of adjustment, as required by existing statutes, shall determine that the proposed special utility and/or associated facilities are essential or desirable to the public convenience and/or not detrimental or injurious to the public health or safety, or to the character of the surrounding neighborhood.
3. The board of adjustment shall determine that the proposed special utility and/or associated facilities will not be unreasonably detrimental to the economic welfare of the county and/or that it will not create excessive public cost for public services by finding that:
 - a. It will be adequately serviced by existing services such as highways, roads, police and fire protection, emergency response, and drainage structures, refuse disposal, water and sewers, and schools; or
 - b. The applicant shall provide such services or facilities.
4. Special utilities and/or associated facilities as defined by this chapter shall use public rights-of-way or established utility corridors when reasonable. Although Kittitas County may map utility corridors, it is recognized and reaffirmed that the use of such corridors is subject to conditional use approval and just compensation to the landowner for the use of such corridor. While a utility corridor may be used for more than one utility or purpose, each utility or use should be negotiated with the landowner as a separate easement, right-of-way, or other agreement, or other arrangement between the landowner and all owners of interests in the property.

- Any county map which shows utility corridors shall designate such corridors as "private land closed to trespass and public use" where such corridors are on private land. Nothing in this paragraph is intended to conflict with the right of eminent domain.
5. The board of adjustment shall consider industry standards, available technology, and proposed design technology for special utilities and associated facilities in promulgating conditions of approval.
 6. The construction and installation of utilities and special utilities may necessitate the importation of fill material which may result in the displacement of native material. The incidental generation of earthen spoils resulting from the construction and/or installment of a utility or special utility, and the removal of said material from the development site shall not require a separate zoning conditional use permit.
 7. The operation of some utilities and special utilities identified within this chapter may necessitate unusual parcel configurations and/or parcel sizes. Such parcels:
 - a. Need not conform with applicable zoning requirements; provided, they comply with the procedures provided in KCC Title 16, Subdivisions, and so long as used for a utility or special utility;
 - b. Are not eligible for any other use or any rights allowed to nonconforming lots in the event the utility or special utility use ceases;
 - c. Shall continue to be aggregated to the area of the parent parcel for all other zoning and subdivision requirements applicable to the parent parcel. (Ord. 2001-12 (part), 2001: Ord. 2000-06 (part), 2000; Ord. 99-14 (part), 1999: Ord. 98-17 (part), 1998).

17.61.040 Communication facilities - Administrative review - General requirements.

1. Communication facilities may be authorized by the Community Development Services director as an administrative conditional use in all zoning districts, pursuant to the criteria and procedures of this chapter and KCC Title 15A and KCC 17.60. An administrative conditional use permit is not required for the operation of amateur or noncommercial communication equipment as defined by FCC regulations under Part 95D and Part 97 CFR (i.e., citizen band, ham radio).
2. Construction of all improvements shall be completed within one year of the date of permit issuance except as provided for in subsections E and F of this section.
3. The lot line setback requirements of this title may be waived by the Community Development Services director, in order to improve the facilities' reception and/or transmission capabilities or to achieve greater levels of audible or visual screening than that which would be available by using the applicable zone's yard requirements.
4. Communication facilities shall be designed to blend with existing surroundings; provided, no conflicts exist with existing Federal Communications Commission and the Federal Aviation Administration regulations relating to aircraft safety. This should be achieved through the use of compatible colors and materials, and alternative site placement to allow the use of topography, existing vegetation or

- other structures to screen the proposed transmission support structure from adjacent lands.
5. The co-location of antennas on both existing and proposed transmission structures is encouraged. Communication antennas shall be permitted outright in all zoning districts provided the following:
 - a. An antenna shall not extend more than six feet horizontally from any structure to which it is attached.
 - b. An antenna shall not extend vertically more than 15 feet above the uppermost portion of the structure to which it is mounted or attached.
 6. Modifications to, including the expansion of, existing approved communication facilities shall be outright permitted; provided, there is no increase in the height of the transmission tower. For purposes of this subsection, "transmission tower" means a pole or lattice-work structure specifically designed and intended to support antenna and related communication equipment. (Ord. 2001-12 (part), 2001: Ord. 2000-06 (part), 2000).

17.61A.010 Legislative findings, purpose and intent.

The purpose and intent of this chapter is to establish a process for recognition and designation of properties located in areas of Kittitas County suitable for the location of wind farms, to protect the health, welfare, safety, and quality of life of the general public, and to ensure compatible land uses in the vicinity of the areas affected by wind farms. (Ord. 2002-19 (part), 2002).

17.61A.020 Definitions.

The following definitions shall be used in conjunction with the administration of this chapter:

1. "Wind farm" means a single wind turbine exceeding 120 feet in height above grade or more than one wind turbine of any size proposed and/or constructed by the same person or group of persons on the same or adjoining parcels.
2. "Wind turbine" means any machine used to produce electricity by converting the kinetic energy of wind to electrical energy. Wind turbines consist of the turbine apparatus and any other buildings, support structures or other related

improvements necessary for the generation of electric power. (Ord. 2002-19 (part), 2002).

17.61A.030 Development uses, requirements, and restrictions.

Development uses, requirements, and restrictions. All listed permitted uses in the underlying zoning district of this overlay zone are permitted. All listed conditional uses in the underlying zoning district of this overlay zone are subject to conditional use permit process and review. Wind farms are a permitted use in a wind farm resource overlay zoning district, subject to the additional approval requirements and restrictions set forth in KCC 17.61A.040. (Ord. 2002-19 (part), 2002).

17.61A.035 Pre-identified areas for siting.

For proposed wind farms located in identified areas in Kittitas County meeting specific siting standards as identified in this code, a process separate from the requirement for wind farm resource overlay zone as identified in Kittitas County Code 17.61A.40 can be undertaken.

The purpose of this code is to identify areas where environmental review and public process has already occurred, expediting the siting of proposed wind farm facilities. The intent of this code is to streamline the development process for such applications, separate from the process already allowed in 17.61A.40. It is recognized that lands contained within this area may be under federal, state and local ownership and may be subject to additional requirements per jurisdiction.

A map of the pre-identified areas identifies the following Townships and Ranges open to this process. This includes T.15N., Ranges 19E., 20E., 21E., 22E., 23E., T.16N., Ranges 21E., 22E., 23E., T.17N., Ranges 21E., 22E., 23E., T.18N., Ranges 21E., 22E., 23E., T.19N., Ranges 21E., 22E., 23E., T.20N., Ranges 21E., 22E., 23E. W.M. in Kittitas County.

The following siting standards are established for these areas: a minimum 1/2 mile setback from existing structures at the time of application shall apply. If not attainable, additional analysis shall be included to support the application. Further, analysis shall also include, but is not limited to, the following as part of the application: wildlife impact analysis, noise impact analysis, visual impact analysis, and traffic impact analysis.

A wind farm may be authorized by the county in these pre-identified areas only through approval of a site plan and development agreement by the board of county commissioners. The development agreement shall be consistent as authorized in Kittitas County Code 15A.11, Development Agreements.

17.61A.040 Approvals required for wind farm resource overlay zone.

1. Except as noted in 17.61A.035, a wind farm may be authorized by the county only through approval of a wind farm resource development permit in conjunction with approval by the board of county commissioners of a development agreement as authorized by Chapter 15A.11 KCC, Development Agreements, and RCW 36.70B.170 through 36.70B.210. Consistent with KCC 15A.11.020(B) and RCW 36.70B.170, the development agreement approved by the board of county commissioners must set forth the development standards applicable to the development of a specific wind farm, which may include, but are not limited to:

- a. Densities, number, size, setbacks, and location of turbines;
 - b. Mitigation measures and such other development conditions as deemed appropriate by the board of county commissioners to be necessary including measures to protect the best interests of the surrounding property or neighborhood or the county as a whole; and
 - c. Other development standards including those identified in KCC 15A.11.020(E) and RCW 36.70B.170(3).
2. Required Applications/Approvals. In addition to approval of a wind farm resource development permit and a development agreement as set forth in subsection A of this section, a wind farm shall require the following approvals from the county:
 - a. A site-specific amendment of the comprehensive plan land use designation map to wind farm resource overlay district (the subarea planning process described in Chapter 1 of the county comprehensive plan and Chapter 15B.03 KCC, Amendments to Comprehensive Plan, may be used if deemed appropriate by the applicant and county);
 - b. A site-specific rezone of the county zoning map to wind farm resource overlay zoning district pursuant to Chapter 17.98 KCC, Amendments.
 3. The approvals by the board of county commissioners set forth in subsections A and B of this section shall only be made if it determined that:
 - a. The proposal is essential or desirable to the public convenience;
 - b. The proposal is not detrimental or injurious to the public health, peace, or safety or to the character of the surrounding neighborhood; and
 - c. The proposed use at the proposed location(s) will not be unreasonably detrimental to the economic welfare of the county and it will not create excessive public cost for facilities and service.
 4. A comprehensive plan amendment or subarea plan for a wind farm resource overlay district must be processed by the county concurrent with the rezone application, development permit, and development agreement required for approval of a wind farm. (Ord. 2002-19 (part), 2002).

PUBLIC FACILITIES PERMITS

Sections

- 17.62.010 Definitions.
- 17.62.020 Purpose.
- 17.62.030 Procedures.
- 17.62.040 Decision criteria.
- 17.62.050 Minimum lot sizes.
- 17.62.060 Appeals.

17.62.010 Definitions.

1. "Public facility" means the capital improvements and systems of transportation, law enforcement, fire protection, and recreational facilities (i.e., parks and playgrounds). Public facilities may be sited in any zoning, classification, subject to the review and approval requirements of this chapter.
2. "Public facility permit" means a written decision by the Community Development Services department authorizing a public facility use to locate at a specific location. (Ord. 2002-03 (part), 2002).

17.62.020 Purpose.

The purpose of this chapter is to establish decision criteria and procedures for the permitting of public facilities and to provide coordinated review of the proposed project. Certain public facilities provide necessary services to other uses but are deemed unique due to factors such as siting criteria, size, technological processes, and requirements for comprehensive facility planning and budgeting. These uses require a certain degree of review to incorporate and document consistency with the comprehensive plan, facility plans, or capital improvement programs, and to assure compatibility with adjacent uses. (Ord. 2002-03 (part), 2002).

17.62.030 Procedures.

Public facilities permits shall be processed in the same manner as zoning administrative conditional uses are processed pursuant to KCC Title 15A, except as otherwise provided in this chapter. (Ord. 200203 (part), 2002).

17.62.040 Decision criteria.

The Community Development Services department shall review public facility permit applications in accordance with the provisions of this section and may approve, approve with conditions, or deny the public facility permit.

1. Required Findings. A public facility permit may be approved by the Community Development Services department only if all of the following findings can be made regarding the proposal and are supported by the record:
 - a. That the granting of the proposed public facilities permit will not:
 - i. Be detrimental to the public health, safety, and general welfare;
 - ii. Be injurious to the property or improvements adjacent to, and in the vicinity of, the site upon which the proposed use is to be located; nor
 - iii. Adversely affect the established character of the surrounding vicinity.
 - b. That the proposed use will not introduce hazardous conditions at the site that cannot be mitigated to protect adjacent properties, the vicinity, and the public health, safety, and welfare of the community from such hazard.
 - c. That the granting of the proposed public facilities permit is consistent and compatible with the intent of the goals, objectives, and policies of the comprehensive plan and any implementing regulations.
 - d. That the facility site and environmental designs:
 - i. Meet local and state siting criteria and design; and

- ii. Have been reviewed and/or commented upon by local and state agencies responsible for issuing permits.
 - e. That all conditions to mitigate the site specific impacts of the proposed use which were identified can be monitored and enforced.
 - f. That all yards, open spaces, landscaping, walls and fences, and other buffering features are properly provided to mitigate the impacts of the facility to make it compatible with the character of the surrounding area.
 - g. That the proposed public facility will be supported by, and not adversely affect, adequate public facilities and services; or that conditions can be imposed to lessen any adverse impacts on such facilities and services.
2. Approval. The Community Development Services department may approve an application for a public facilities permit or approve with additional requirements to comply with specified requirements or site conditions.
 3. Denial. The Community Development Services department may deny a public facility permit if the proposal does not meet or cannot be conditioned to meet the required findings. (Ord. 2002-03 (part), 2002).

17.62.050 Minimum lot sizes.

The operation of some public facilities may necessitate unusual parcel configurations and/or parcel sizes. Such parcels:

1. Need not conform with the applicable minimum lot size for the specific zone the public facility is to be located; provided, they comply with the procedures provided under KCC Title 16, Subdivisions, and so long as used for a public facility;
2. Are not eligible for any other use or any rights allowed to nonconforming lots in the event the public facility ceases to operate;
3. Shall continue to be subject to all other zoning and subdivision requirements applicable to the parent parcel;
4. For Chapter 17.29 KCC, A-20 Agricultural Zone, and Chapter 17.31 KCC, Commercial Agriculture Zone, the splitting of property for a public facility would not be considered as a one-time split for that property. (Ord. 2002-03 (part), 2002).

17.62.060 Appeals.

Any aggrieved party with standing may appeal a decision to approve or deny a public facilities permit within 10 working days of the date of decision pursuant to KCC Title 15A. (Ord. 2002-03 (part), 2002).

17.74.005 Policies on agricultural land use.

Agriculture has priority in matters dealing with conflicting land uses in agricultural areas. (Ord. 96-5 (part), 1996).

17.74.010 Purpose and intent.

The history, economy, culture and the future of Kittitas County revolve around agricultural activities. The Kittitas County board of county commissioners finds that the agricultural areas of Kittitas County are increasingly subjected to nuisance lawsuits and

that such lawsuits encourage and even force the premature removal of lands from agricultural uses. It is therefore the purpose of this chapter to provide:

1. That agricultural activities in Kittitas County on land used for agriculture be protected; and
2. Notice to individuals who locate on or near an area used for agriculture, that agricultural activities are allowed, encouraged and promoted as the acceptable use of land in those areas, and by locating in such areas they are doing so with this understanding.
3. This chapter is not intended to replace or diminish state code and is intended only to enhance its provisions for the right to farm. (Ord. 96-5 (part), 1996).

17.74.020 Definitions.

1. "Farm" means land, buildings, livestock, and machinery devoted primarily to the production for commercial purposes of agricultural commodities on lands used for agriculture outside urban growth areas and urban growth nodes and on lands used for existing and on-going agriculture within urban growth areas and urban growth nodes.
2. "Supporting facilities" include, but are not limited to, roads and waterways, storage, processing, conditioning and sale facilities within the county on lands used for agriculture outside urban growth areas and urban growth nodes and on lands used for existing and ongoing agriculture within urban growth areas and urban growth nodes.
3. "Agricultural activity" includes, but is not limited to, the growing or raising, harvesting, storage, disposal, transporting, conditioning, processing, sale, and research and development of, but not limited to, the following: horticultural crops, poultry, livestock, grain, mint, hay, forages and feed crops, apiaries, beekeeping, equine activities, leather, fur, wool, dairy products and seed crops. Agricultural activity may involve, but is not limited to, the following operations and conditions: on-farm and roadside marketing, dust, fumes, vapors, gases, smoke, odors, and noise from the farm or farm activities, open burning; operation of machinery; movement (including use of current county road ditches, streams, rivers, canals, and drains, etc.) and use of water for agricultural activities; ground and aerial seeding and spraying; application of fertilizers, conditioners, pesticides and associated drift of such materials; employment and use of labor, roadway movement of equipment and livestock, protection from damage by wildlife; prevention of trespass; construction and maintenance of buildings, fences, roads, bridges, ponds, drains, waterways, etc. and maintenance of stream banks and watercourses; and conversion from one agricultural activity to another, including a change in the type of plant-related farm product being produced. The term includes use of new practices and equipment consistent with technological development within the agricultural industry
4. "Generally accepted agricultural and management practices" means historic practices, and those practices as defined or recommended by the United States or Washington State Department of Agriculture, Agricultural Stabilization and

Conservation Service, Soil Conservation Service, Washington State University Cooperative Extension, Kittitas County Conservation District and other professional and agricultural organizations. These practices may be modified to reflect varying conditions which include, but are not limited to, geographical location, weather, soil types and conditions, type of crop or livestock and management system.

5. "Agricultural land" means land primarily devoted to the commercial production of horticulture, viticulture, floriculture, dairy, apiary, vegetable, or animal products or of berries, grain, hay, straw, turf, seed, Christmas trees not subject to the excise tax imposed by RCW 84.33.100 through 84.33.140, finfish in upland hatcheries, or livestock.
6. "Agriculture" is the grazing, feeding, and watering of livestock, plowing, seeding, cultivation and harvesting for the production of crops and pasture; soil and water conservation practices; the creation and maintenance of farm or stock ponds, irrigation ditches, drainage ditches, underground drainage systems, fences and farm roads, the control of noxious weeds, and includes any associated structures, appurtenances, equipment or activities.
7. "Lands used for agriculture" means lands where agriculture is allowed either as a permitted use or a conditional use or not prohibited by the zoning code. If ongoing and existing agricultural activities occur inside urban growth areas or urban growth nodes, these shall be considered as "lands used for agriculture". (Ord. 96-5 (part), 1996).

17.74.030 Agricultural activities - Presumed reasonable and not a nuisance.

Notwithstanding any other provision of the Kittitas County Code, agricultural activities conducted on the farm, or supporting facilities if consistent with good agricultural practices and established prior to surrounding nonagricultural activities, are presumed to be reasonable and do not constitute a public or private nuisance unless the activity has a substantial adverse effect on the public health and safety.

If that agricultural activity is conducted under generally accepted agricultural and management practices and does not conflict with federal, state, and local laws and regulations, it is presumed to be a good agricultural practice not adversely affecting the public health and safety. Agricultural activity shall not be limited as to hours of the day nor days of the week. (Ord. 96-5 (part), 1996).

17.74.040 Immunity from private action based on agricultural activity on certain lands - Exceptions.

1. No agricultural activity, as described in Section 17.74.030, on lands used for agriculture outside urban growth areas and urban growth nodes and on lands used for existing and on-going agriculture within urban growth areas and urban growth nodes shall give rise to any private rights of action or claim for relief.
2. Subsection A of this section shall not apply to a right of action or claim for relief for damage to commercial agricultural products.

3. If the urban growth boundary is changed in such a way as to place an agricultural activity outside its limits, subsection A of this section applies to that agricultural activity after the date the urban growth boundary is changed. (Ord. 96-5 (part), 1996).

17.74.050 Reserved.

(Ord. 96-5 (part), 1996).

17.74.060 Notification and disclosure.

To facilitate cooperation between agricultural activities and nonagricultural activities, there will be resource activity notification and disclosure as follows:

1. All plats, short plats, development permits, and building permits issued for development activities on or within one thousand feet of land zoned Agriculture-3, Agriculture-20, Commercial Agriculture, or Forest and Range shall contain the following notice: "The subject property is within or near land used for agriculture on which a variety of commercial activities may occur that are not compatible with residential development for periods of varying duration. (RCW 36.70A.060(1)) Commercial natural resource activities performed in accordance with county, state and federal laws are not subject to legal action as public nuisances." (RCW 7.48.305).
2. Disclosure Statement. The disclosure statement required by this section shall be used under the following circumstances and in the following manners:
 - a. Copies of the disclosure statement notice substantially in the form as set forth in sub-part (2)(a) herein shall be posted for public view in appropriate locations in the Kittitas County Courthouse and other appropriate county public building locations. Copies of such disclosure statement notices shall also be transmitted to real estate agents, title companies and attorneys located in Kittitas County for their use in posting or such other use as they may deem appropriate to assist them in advising their clients of the existence of this chapter.
 - b. Upon the issuance of a development permit by Kittitas County Community Development Services including, but not limited to, subdivision permits and use permits, for use on or adjacent to lands zoned for agriculture, the development permit shall include a condition that the owners of the property shall be required to sign a statement of acknowledgment containing the Disclosure set out in sub-part (2)(a) on forms provided, which shall then be recorded with Kittitas County.
 - i. Disclosure Statement. "The County of Kittitas supports the continuation and development of properly conducted agricultural operations within the County and has enacted a Right to Farm For the Protection of Agricultural Activities Ordinance (KCC 17.74). If the property you are purchasing is located near agricultural lands or operations or included within an area zoned for agricultural purposes, you may be subject to inconveniences arising from such operations. Inconveniences may occur as a result of agricultural

operations which are in conformance with existing laws and regulations and accepted customs and standards. These inconveniences may include, but are not limited to: noise, odors, fumes, dust, smoke, insects, operation of machinery (including aircraft), and the driving of machinery and/or livestock on public and private rights-of-way during any 24 hour period, storage and disposal of manure, and the application by spraying or otherwise of chemical fertilizers, soil amendments, herbicides and pesticides. If you live near an agricultural area, you should be prepared to accept such conditions as part of the custom of a county with a strong rural character and an active agricultural sector". (Ord. 96-5 (part), 1996).

17.74.070 Severability.

If any section, subsection, sentence, clause, phrase, part or portion of this chapter is for any reason held to be invalid or unconstitutional by any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this chapter or the application of the provisions to other persons or circumstances. (Ord. 96-5 (part), 1996).
