Subject: Well Moratorium

August 13, 2009

Dear Commissioner McClain;

As Kittitas County landowners, my husband and I hope we can count on you to do whatever it takes to get well water rights back for our property in Tillman Creek.

We put our life savings in this property as an investment and as our future retirement home for us and our family. Now we can't even think about building our house on our lot or being able to sell off the other 4 lots we platted to be able to afford the building of our home. This well moratorium is making our land worthless and making it impossible for us to move forward with our building plans. We are concerned about our financial future.

Is there anything as landowners and citizens we can do to help end the well moratorium? Is there any one else we should write besides the Governor.

We hope you will support the end of the well moratorium at the hearing today.

Thank you, Jayne and John Leet
