Please Help !!!!!

I am just an ordinary man trying to have place for my kids to grow up enjoying this beautiful county as I did with my parents. I am not a wealthy man and I am not out to develop the country side. I bought 21 acres, I have preliminary plat approval, my well is in " by the book " with DOE and Health dept. certification. Now I can't use it ?

My goal is to sell a lot or two to recoup some of my costs and end up with a place to call my own, share with my family and leave to my kids some day.

I know there is millions of dollars worth of land out there that is about to be deemed useless causing hundreds of people just like me to lose it all and further drive this economy into the ground. Please Help !!

Thank you for your time

Jim Loen
