STUDY SESSION MINUTES

February 3, 2003

BOARD OF KITTITAS COUNTY COMMISSIONERS

THOSE PRESENT: Max Golladay, Perry Huston, Bruce Coe, Paul Bennett, Kelly Carlson

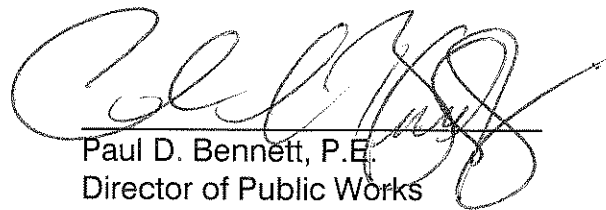

GLADMAR LEVEE: Paul explained that Cascade Irrigation is having problems getting water in their ditch and Trendwest if offering to help alleviate this problem. Paul stated that the last fix seemed to achieve a good balance in the river flow, but there is erosion occurring around the notch. What CID and Trendwest are proposing is for the County to pay for all the rock used to do the project and Trendwest and CID will perform work. They are proposing that it will take approx. 500 tons of rock for our portion and the cost would be approx. \$10,000. Paul said that this is not budgeted but that he will take corrective action when the bill comes in. Paul requested approval from the BOCC to fund the flood control on this project for \$10,000. BOCC approved and Paul will submit a letter of request to Judy (Auditor's Office).

FLOODING IMPACTS: Paul was very happy with the way Brickmill (new construction) held up. There was some rock that was washed away but all in all it still looks ok. The blockage upstream (no-name creek) from Brickmill caused most of the water over the road. Paul asked the BOCC if he could take the liberty of removing blockages like this one that are off county property but are causing damage to roads at some other point. BOCC approved.

CRAB CONSOLIDATION: Paul stated that the Governor's Office was the only entity to speak in favor of this consolidation.

EVALUATIONS: Paul informed the BOCC that to the best of our knowledge we have completed all of the evaluations due from Public Works.

Adjourned at 4:20

Paul D. Bennett, P.E.
