ROUTEVIEWER PRESENTATION:

Director Kirk Holmes presented the RouteViewer software program to the Commissioners, stating that the WSDOT worked with the County to update the images for 2008. Every mile of the County road system is pictured. The staff can view images of roads and bridges at their desks without going out of the office. Signage and guardrail can be inventoried, and it's a great tool for access management. Kirk explained the problem with older culverts being narrower than the roads and the frustration experienced when dealing with Department of Fish & Wildlife officials while attempting to design replacements.

Board Direction:

No direction.

Meeting adjourned at 1:50 pm
