Hi Bradley,

WDFW doesn't have many comments about this proposal, but the watercourse along the northern portion of this parcel appears to be an irrigation return. This feature is worth mentioning because of how entrenched it is and that it poses potential erosion concerns in the future. This feature also flows directly to the Yakima River, so ensuring good water quality in this watercourse helps ensure good water quality in the Yakima River and protection of aquatic life in the river. For this reason, we recommend future building setbacks treat this water feature with adequate riparian setbacks of at least 100 feet.

Thank you for the opportunity to comment and please let us know if you have any questions.

Jen
