Hi Zach,

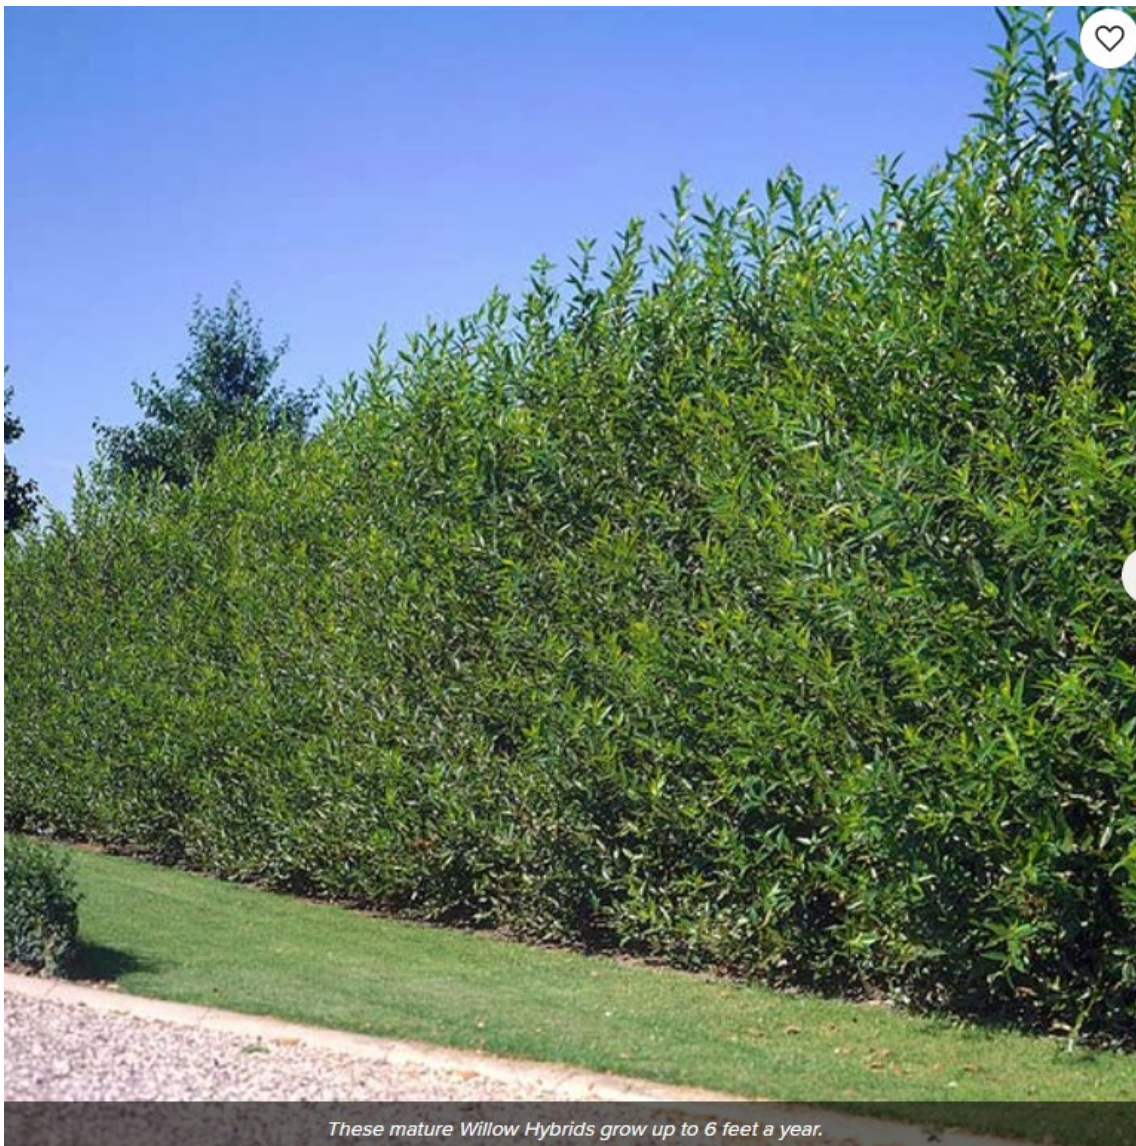

My wife and I received a letter in the mail that Level 3 Communications was going to be building an additional 23'x36' communications shelter next to our house, parcel 14907 – 4080 Lower Peoh Point Road, Cle Elum, Wa.

While I am not overly thrilled with this, I understand this is their property and they can do as they wish. I do have a couple of questions and concerns with the additional shelter being built. I want to preface my email with I am not trying to be a Karen, just a concerned homeowner protecting home value.

1. Does Level 3 communications have any purposed landscaping to be installed around the shelters? It was told to us by Cliff Winfrey & Shelley Winfrey, former owners of the Alloway short plat, that landscaping would be provided around the existing communications shelter onsite.
 - a. To date, there has been no landscaping completed around the existing structure.
 - b. Will the new structure and current structure receive any landscaping?
2. The existing shelter when it kicks on, generates noise, will they both run concurrently?
Curious because that will generate an obnoxious amount of noise.

My only request as a homeowner trying to protect my property value would be to have Level 3 communications plant Hybrid Willows down the property line from Lower Peoh to the furthest south communications structure for noise and eye sore mitigation.

These mature Willow Hybrids grow up to 6 feet a year.

Thank you,
Tyler Kretschman
