

Memo

To: Jeff Watson, CDS

From: Erin Moore, Environmental Health Technician

Date: March 6, 2014

RE: BL-14-00004 DeFaccio

After review of this BLA, it appears that the proposed changes will incorporate the existing home, well and septic system onto one parcel, so no easements will be necessary. Based on the information, provided it also appears that the well and septic meet all applicable setbacks to property lines. Based on this information EH recommends approval of this BLA.

Please let me know if you have any questions or need further information.
