Good Morning Kelly,

My wife and I have a home on Domerie Bay Road. I have been told that the proposed entrance to the commercial storage unit development is on Domerie Bay Road and not on Salmon la Sac 903 roadway. I am the president of our homeowners association for the private dead end Domerie Bay Road. I am opposed and concerned about the commercial development entrance being on our privately maintained dead end road.

I collect dues from current residents to maintain the roadway. This includes seal coating and snow plowing. Using the Domerie Bay road for a public right of way access to a commercial development was not what this road was designed or maintained for. We also have security concerns for bringing the public onto our road.

Please take our comments under consideration during your review period. I know others on the road are also opposed and you may receive comments from them as well.

Please feel free to call me to discuss further.

Mark and Jill Marcell
