Hi Kelly,

This is Stephen and AnnMarie Lawler. We have a home at 640 Domerie Bay Road and an additional waterfront lot on Domerie Bay Road. We saw the sign posted on our road and are opposed and concerned about having a commercial business entrance on a quiet private dead-end road.

The Domerie Bay homeowners paid to construct and maintain the road. It was never designed for commercial traffic. There are only about 15 homes with access to the road so currently use is minimal. The addition of commercial property access will dramatically increase traffic and congestion at the entrance.

In addition, a community gate was added to deter random access and reduce risk to children and pets playing. Although it doesn't deter everyone it has helped. We have had issues with people thinking the road leads to the lake with cars, ATVs, dirt bikes etc entering and sometimes driving over personal properties to reach the lake. This traffic should be using the public access points like Wish Poosh. The addition of commercial access for storage units will increase this unauthorized access.

We think the access for this commercial property should be from Salmon la Sac 903. Separating the commercial customers from the personal residential access provided by Domerie Bay Road.

Thanks for considering our concerns. Feel free to contact us to discuss.
