RE: Schmaus #4 Preliminary Plat (P-07-55)

Dear Ms. Moynihan,

Thank you for the opportunity to comment on the above referenced project. I recommend that the existing well on lot 2 be used as a Group B water system to serve the seven proposed lots. A well site inspection must be performed to approve the site where the well is. The group B workbook and all associated paperwork must be turned in and the system design approved prior to final plat approval.

The file indicates soil log information is needed on each lot.

If you need any further information, please feel free to contact me. Thank you for your time.

Sincerely,

Holly Duncan
Environmental Health Specialist
