**5i.** List all wetlands on or adjacent to the project location. [\[help\]](#)

The 5.6-acre site has approximately 1,400 feet of shoreline adjacent to the Columbia River. There are no NWI wetlands at the site however three lake-fringe wetlands were identified at the site in March of 2012.

**5j.** List all waterbodies (other than wetlands) on or adjacent to the project location. [\[help\]](#)

This project is along the western shore of the Columbia River just north of Vantage, WA.

**5k.** Is any part of the project area within a 100-year floodplain? [\[help\]](#)

Yes    No    Don't know

**5l.** Briefly describe the vegetation and habitat conditions on the property. [\[help\]](#)

The northern portion of the site (north of Recreation Drive) has a 25-50 foot strip of forested riparian buffer. Vegetation within this forested buffer consists primarily of black locust (*Robinia pseudoacacia*) with some Siberian elm (*Ulmus pumila*) and Russian olive (*Elaeagnus angustifolia*), all non-native trees. South of the jetty, the forested riparian buffer is wider (50 to 150feet) with vegetation consisting of the same tree species (black locust, Siberian elm and Russian olive) and shrubs species such as sweetbriar rose (*Rosa eglanteria*) and smooth sumac (*Rhus glabra*) predominating. Upland of the forested riparian buffer and throughout the rest of the site sagebrush habitat dominates with vegetation consisting of big sagebrush (*Artemesia tridentata*), rabbit-brush (*Chrysothamnus nauseosus*), antelope-brush (*Purshia tridentata*) and various upland grasses. The sagebrush and forested buffer areas are crisscrossed with user-defined trails. Small amounts of human debris and garbage are scattered throughout the buffer and along the shoreline.

Landward of the forested riparian area the Project Site is dominated by sagebrush habitat with vegetation consisting of big sagebrush (*Artemesia tridentata*), rabbit-brush (*Chrysothamnus nauseosus*), antelope-brush (*Purshia tridentata*) and various upland grasses. The sagebrush and forested buffer areas are crisscrossed with user-defined trails. This area is where the majority of the site improvements will be occurring.

**5m.** Describe how the property is currently used. [\[help\]](#)

The Rocky Coulee Recreation Area includes two picnic sites, two ADA compliant vault toilets, ten campsites with picnic tables, walking trails, and 18 parking sites.

**5n.** Describe how the adjacent properties are currently used. [\[help\]](#)

Land use adjacent to and north of the Project Site is currently zoned Forest and Range. The site is situated north and east of the Ginkgo Petrified Forest State Park (owned by Washington State Parks), west of the Wanapum Reservoir (owned by Grant PUD), and south of a parcel of land owned by Stockdale, Inc. The Ginkgo Petrified Forest State Park interpretive center is located approximately 250 feet south of the Project Site. Residences along the northern edge of the town of Vantage are within half a mile south of the Project Site. North and west of the Project Site there are no buildings or structures for at least 5 miles.

**5o.** Describe the structures (above and below ground) on the property, including their purpose(s) and current condition. [\[help\]](#)

Old State Highway Road (i.e. Recreation Drive), sidewalks, restrooms, and gravel tent camping spaces and picnic areas.

Grant PUD is proposing to repair and replace posts and campsite numbering posts replacement due to being destroyed in a Vantage Highway Wildfire in August 2022.

**5p.** Provide driving directions from the closest highway to the project location, and attach a map. [\[help\]](#)

This site is located on the right bank (west) side of the Columbia River, upstream of the I-90 bridge crossing at the old Highway 10 West site. From Vantage, take Hwy 10 West to Recreation Drive, turn right on Recreation Drive. Travel to road end at Columbia River. Camping area to the south.

## Part 6—Project Description

**6a.** Briefly summarize the overall project. You can provide more detail in 6b. [\[help\]](#)

**Post & Rail Fence:** Replacement of post and rail fence will use same post locations as fence built during original construction. Posts are generally installed ~2' into ground. In total, 4 posts need to be replaced.

**Campsite Posts:** Replacement campsite posts will use same post locations used during original construction. These are 4"x4" wooden posts. In total 3 campsite posts need to be replaced.

**6b.** Describe the purpose of the project and why you want or need to perform it. [\[help\]](#)

On August 1st, 2022, the Vantage Highway Fire burnt through the southern half of Rocky Coulee Recreation Area. As a result, sections of post and rail wooden fence, three 4"x4" campsite number posts and shoreline vegetation were destroyed. Grant PUD is proposing to repair/replace the existing, but burnt, post and rail fence and 4"x4" campsite number posts that were destroyed.

**6c.** Indicate the project category. (Check all that apply) [\[help\]](#)
