Good morning, Bradley,

I have reviewed the SEPA checklist and associated documents. I have concerns regarding impact to park property and future maintenance requirements with the water conveyance at this location. The landowner has already diverted a flow of water from their property onto state property into existing drainage.

The following are questions/comments received from park staff:

- 1) Have the landowners actions been approved through the Department of Ecology through a water mitigation plan?
- 2) Has the water conveyance been engineered?
- 3) Source of the water and potential future impacts?
- 4) The landowner should have an approved water mitigation plan through the Department of Ecology and the County.
- 5) This has been an ongoing issue with private property owners diverting their water flow onto State Parks property without approval from the Department of Ecology and State Parks.
- 6) The added water flow has caused flooding up against the Palouse to Cascades Trail (PTCT) which has caused erosion of the trail base in certain areas.
- 7) Recommend requiring the landowner to convey the water entirely on private property should the access be approved.

Thank you for the opportunity to comment.
